

NITIN NEGI

Software Engineer | Full Stack Developer

neuralnitin@gmail.com | +91-9557628010 | [linkedin.com/in/neural-nitin](https://www.linkedin.com/in/neural-nitin) | leetcode.com/u/neuron_nitin

PROFESSIONAL SUMMARY

Full Stack Software Engineer who ships production SaaS across the Python (FastAPI) and Node.js (Express, TypeScript) ecosystems. Comfortable end to end — REST APIs, PostgreSQL and Supabase data layers, and React frontends — with applied experience in AI, including RAG systems and RAG-powered chatbots. Hands-on with AWS, Docker, and modern tooling like the Vercel AI SDK to take features from idea to production.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript

Backend: Node.js, Express, TypeScript, FastAPI, Python

AI & Tools: RAG systems, RAG-based chatbots, LLM integrations, Vercel AI SDK

Databases & ORM: PostgreSQL, Supabase, SQLAlchemy, Alembic

Async, Scraping & APIs: Asyncio, HTTPX, BeautifulSoup, Regex, API Integrations

Cloud & DevOps: AWS (EC2/S3), Docker, Git, GitHub

Exploring: Web Scraping at scale, Machine Learning basics

WORK EXPERIENCE

Software Engineer, Full Stack – Sonoka.asia

Dec 2025 – Present

India (Remote)

- Promoted from intern to Software Engineer; leading full-stack development of Otto, a multi-platform productivity app spanning web, mobile, and desktop.
- Building backend services and REST APIs with Node.js, Express, and TypeScript, complementing the existing Python/FastAPI stack.
- Designing shared, type-safe data models in TypeScript and implementing API integrations and real-time sync across platforms.
- Owning feature delivery end to end, from API design and PostgreSQL schema to React-based UI integration and deployment.

Tech Stack: Node.js, Express, TypeScript, Python, FastAPI, React, PostgreSQL, Docker, AWS (EC2/S3)

Full Stack Intern – SaaS Automation Platform, Sonoka.asia

Jun 2024 – Dec 2025

India (Remote)

Developed a SaaS platform automating resume and portfolio creation via a WhatsApp chatbot, processing user data through backend APIs to deliver structured outputs and reduce manual effort.

- Developed backend REST APIs using FastAPI to process user inputs and generate structured resume and portfolio data.
- Integrated third-party APIs and managed PostgreSQL database operations for scalable data handling.
- Assisted in Docker-based deployment and cloud hosting on AWS EC2/S3.
- Collaborated with the frontend team to integrate APIs with a React-based UI.

Tech Stack: Python, FastAPI, React, PostgreSQL, Docker, AWS (EC2/S3), WhatsApp Business API

PROJECTS

Real-Time Speech-to-Text System

Designed a real-time audio processing pipeline using Python, FastAPI, and Whisper to process streaming audio inputs, applying chunk-based transcription, preprocessing techniques, and modular services for low-latency, scalable speech recognition.

Tech Stack: Python, FastAPI, WebSockets, Librosa, NumPy, Audio Processing, Async Pipeline

Tech News Intelligence Scraper

Designed an async web scraping pipeline using Python, FastAPI, BeautifulSoup, and HTTPX to collect, classify, and summarize tech news and company data.

Tech Stack: Python, FastAPI, Asyncio, HTTPX, BeautifulSoup (bs4), Regex, Custom Content Classifiers, Async Pipeline, Modular Service Design

EDUCATION

Bachelor of Technology in Computer Science

CGPA: 7.8

Uttarakhand Technical University, Dehradun, India
